

TRUE ORIGIN<sup>®</sup>

LAB GROWN DIAMONDS

VOLUME VIII

*Exclusively through*

EROVON<sup>®</sup>

## LOVE YOUR CHOICE

What's the difference between  
True Origin® Lab Grown Diamonds  
and Mined Diamonds?

Consider ice for a moment, it can form over a pond or in your freezer, but no matter where the water freezes, it is always ice and contains the same chemical properties.

### **THE DIFFERENCE IS ORIGIN.**

Similar to freezer-formed ice and naturally occurring ice, lab grown diamonds have the same chemical composition, crystal structure and physical properties as mined diamonds.

The only difference is the origin.

With True Origin®, you now have another choice.  
Remember to always "Love Your Choice".
